The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Giovacchino (JAOCS 71(11)1994) and see page 1189, column 1 and Table 4 as further evidenced by van Putte (6,338,865) for reasons of record used in rejecting claims 2-6 and 24-27 in the last office action.

Applicant argues that Giovacchino teaches away from the concept of adding water to enhance polyphenol extraction. This argument has been considered but is not persuasive. The Giovacchino reference teaches the same process as that set forth in the claims. The claims do not specify the type of polyphenolics that are extracted or the extraction method used. At page 1193, column 1 of Giovacchino, the oil and water soluble polyphenolics are disclosed. Also the reference suggests that, in over-ripe olives, certain analytical results may include a false positive for polyphenols. Thus the reference does not teach away from the claimed invention. Given the overall teachings in the reference, it is the examiner's

position that the same steps of processing olives in the same relationship would have produced the same results of higher polyphenol content. One of ordinary skill in the art, that had at least one college level food science course or a course in organic chemistry that included and oil and water partition lab, would have anticipated that more water soluble polyphenols would have been expected to be extracted in the presence of additional extraction water.

Claims 9-23 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
